Mon Lumi – MOB

Désserte pour module MISC

MOB, Stainless-Steel Support and Safety Cart for MISC Models

The cart lets you place and/or secure your MISC on a removable shelf, adjust its height for table or floor projection, and provide stable, secure support for the device.

Position the cart in front of the desired projection surface, then adjust the height of the device to obtain the required projection size.
Simply secure the removable support shelf at the desired height and attach the MISC using the safety fasteners for comfortable, secure operation.

The same applies to floor projection: the removable support shelf can be positioned lower or higher to suit the available projection surface.

Supplied with rear storage compartments (for keyboards, styluses, documentation, additional cameras, etc.).
