

SNOZPOD

Immersion, from wall to floor

One mobile, all-in-one system to create a sensory environment in your room, whenever and wherever you want !

Immersion on the move. Your room transformed.

Create a space to unwind or explore, at each person's own pace.

With SNOZPOD, create an immersive Snoezelen environment across walls and floors to support relaxation and sensory exploration.

Three ways to experience immersion

A SETTING FOR EVERY SESSION

01

Snoezelen & relaxation

Visual and sound environments for Snoezelen spaces, or to quickly turn a room into a place to unwind. Add a tactile dimension with suitable accessories.

02

Interaction & discovery

Floor projections that invite exploration and interaction. A shared visual setting for discovery and guided activities.

03

Mobility & rehabilitation

An immersive floor for movement activities and mobility or rehabilitation sessions guided by a professional.

Sensory accessories depend on configuration. Images are illustrative.

One mobile system. Your configuration.

DUAL PROJECTION CONCEPT

Immersive wall

Approx. 350 × 210 cm
Expandable beyond 450 × 350 cm

Interactive or ambient floor

Approx. 300 × 200 cm

Indicative dimensions depend on throw distance and room configuration.

Two brightness levels for your space

1,200 lm

Dark Environments

4,000 lm

Normal lighting conditions

Audio & control

Audio playback and control panel.
Lighting synchronised with video content,
depending on configuration.

Build your sensory environment

Accessories and options depend on configuration: bubble column, fibre optics, star projector and connected buttons. Not all accessories shown are included in the base version.
